

GAURAV PANDEY

Bhopal, Madhya Pradesh, India | 7067932742 | gauravpanday388@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [LeetCode](#)

OBJECTIVE

Aspiring Full-Stack Web Developer with hands-on experience building and deploying MERN-stack applications. Recent Computer Science graduate seeking an entry-level role to apply strong fundamentals in JavaScript, React.js, Node.js, and MongoDB, and contribute fresh ideas and problem-solving skills to a growth-oriented engineering team.

EDUCATION

IES College of Technology, Bhopal (Affiliated to RGPV) B.Tech – Computer Science & Business Systems (CSBS), CGPA: 7.0	Bhopal, M.P. 2022 – 2026
Nandan Kids Higher Secondary School – M.P. Board Intermediate (12th) – 64% Matriculation (10th) – 72%	Rewa, M.P. 2022 2020

SKILLS SUMMARY

Languages: Java (DSA & OOPs), JavaScript (ES6), Python (Basic)

Frontend: React.js, Redux Toolkit, Context API, HTML5, CSS3/SCSS, Material UI

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Database: MongoDB, MongoDB Atlas, SQL Server

Deployment & DevOps: Docker, AWS (EC2, ECR), Render, Git, GitHub, Linux

Other: JSON, AJAX, jQuery, Nodemailer, Bcrypt, Agile, SCRUM, Jest, PyTest, Mocha

AI Tools: Claude AI, GitHub Copilot, Figma MCP, Jira MCP

CS Subjects: Data Structures and Algorithms, Object-Oriented Programming, Database Management System, System Design (LLD), Operating System, Computer Networks

INTERNSHIP EXPERIENCE

Web Development Intern — Sysslan IT Solutions (Remote) **June 2026 (Completed)**
Status: Completed

- Collaborated with a cross-functional team on ongoing web development projects, contributing to feature implementation, code reviews, and technical documentation.
- Contributed to strategy development and implementation for web application features, balancing technical feasibility with project goals.

PROJECTS

CodesCastle – Online Programming Judge Platform **Jan 2025 – Current**
[GitHub](#) | [Live Demo](#)

- Built a full-stack online judge platform for writing, compiling, executing, and submitting code with real-time verdicts.
- Frontend (Deployed on Render):** Built with React.js, Redux Toolkit, and Material UI; implemented dark/light themes, JWT-based authentication (Sign Up / Login / Log Out), an in-browser code editor, and a problem list with verdict display.
- Backend & Database:** Architected two Node.js/Express.js servers — one for core APIs and one dedicated to isolated code execution — with MongoDB Atlas (via Mongoose) for user, submission, and problem data. Used React hooks (useState, useEffect, useSelector, useNavigate), Redux thunks, and Axios for API communication.
- Deployment:** Containerized both backend services with Docker and deployed on Render; the main server forwards code-execution requests to the dedicated compiler service over a custom Docker network.

STODO – Student Door to Marketplace **Dec 2024 – Current**
[GitHub](#) | [Live Demo](#)

- Built a responsive marketplace web app for students to buy/sell used items within a 20 km radius, with live chat and deal finalization.
- Frontend (Deployed on Render):** Built with React.js, custom CSS3 (modular per-feature stylesheets), and the Context API for global state management; designed a mobile-friendly, animated UI with routes for Home, Product Listings, Product Details, Authentication, and Chat. Implemented secure email/password auth with OTP verification (6-digit, via Nodemailer) and geolocation-based filtering to show listings within 20 km of the buyer.
- Backend & Database:** Built RESTful APIs with Node.js and Express.js for authentication, product management, location filtering, and chat; secured sessions with JWT and bcrypt password hashing; stored user, product, chat, and deal data in MongoDB.
- Deployment:** Dockerized the backend for consistent environments and deployed on Render with SSL and securely managed environment variables.
